DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 25-43 and 50-51, drawn to a proton-conducting polymer membrane;

Group II, claim(s) 44-46, drawn to an electrode;

Group III, claim(s) 47-49, drawn to a membrane electrode assembly.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I claims is the claimed proton-conducting polymer membrane, and this feature is not present in Groups II and III. The special technical feature of Group II claims is the electrode and this feature is not present in Groups I and III. The special technical feature of Group III claims is the membrane electrode assembly, and this feature is not present in Groups I and II. Therefore unity of invention is lacking.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

a/ a single disclosed species of the aromatic tetraamino compound should be elected;

b/ a single disclosed species of the aromatic carboxylic acid should be elected;

c/ a single disclosed species of the aromatic tricarboxylic acid should be elected;

d/ a single disclosed species of the heteroaromatic carboxylic acid should be elected;

e/ a single disclosed species of the pyridine derivative should be elected;

f/ a single disclosed species of R, Z, and A substituents should be elected;

g/ a single disclosed species of the compounds in step A) should be elected.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 25 and 26 to the species of group a;
Claims 25, 27 and 29 to the species of group b;
Claim 28 to the species of group c;
Claim 31 to the species of group d;
Claim 32 to the species of group e;
Claims 34 and 36 to the species of group f;
Claim 44, 48 and 50 to the species of group g.

Art Unit: 1713

The following claim(s) are generic: 25, 44, 47 and 50.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: there is no subject matter common to all the claims.

4. A telephone calls were made to Mr. Alexander Akhiezer (Registration No. 54,617) on August 3, 2006, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
